

Special Needs List for India

21419

Children's Program (CP), United Intl School (UIS), Womens Empowerment Program (TC), Community Transformation (CTC)

Where	The Need	Quantity	USD per unit	Description
CP	Refurbished Laptop	6	\$ 483	Most of our projects are located in the poorest of the poor communities, which also means that they lack in the IT infrastructure. Some of the locations are in such remote areas that the location coordinator has to travel 10-15 miles to access internet, email, etc. Having a computer at each of the project location would certainly be a blessing and enable us to work at a faster pace. This has been one of the long pending need at our projects.
CP	All-in-one Printer	8	\$ 83	Scanner, copier and printer would be of great help with office correspondence
CP	Portable PA system	8	\$ 154	In the recent months, through some of our sponsors' generosity we were able to distribute Mini Projectors to six of our projects across India. The Mini projectors are useful in screening Bible stories, to conduct awareness, educational and other programs at projects. We are in need of portable PA system - the speakers would really help the children to enjoy the audio experience. The PA system would also include a mike which will help us address smaller group of audience (around 100 in number) during these programs.
CP	Inverter with batteries	2	\$ 662	We are praying for an UPS (uninterrupted power supply) for our Cuttack and Ambur Projects. The child care centre at Cuttack is located in a slum and the Ambur project is in a remote village and there are frequent power cuts for long hours. Amid soaring temperatures and dark rooms at the project centre an inverter would certainly help provide the required power backup to keep the fans and lights on for the children to continue their time at the child care center without any hindrance.
CP	Mini Projector with screen	2	\$ 162	We are in need of mini projectors at our project locations in order to screen Bible stories, movies, action songs and even their academic lessons during the study time. Out of eight locations, God has already provided for six, we are praying for two more.
CP	Air coolers	8	\$ 147	During summer the temperature in India rises up to 120 degree F in most part of the country. The cool air from the air cooler could bring some relief from the humidity and provide a cool atmosphere for the children and staff at the child care center.
CP	Floor mats/Plain Carpets	50	\$ 10	The children usually sit on cement floor which is very inconvenient affecting their health. Children would feel much better sitting on the floor mats/carpets.
CP	Emergency Lights	10	\$ 74	At some of our projects such as Pappakoil, Cuttack, Ambur, KGF, etc. children come to the child care center after their school hours for a time of devotion, study, meal and games. With the projects being located at remote areas the power supply is intermittent. This leaves the children to spend the rest of the time at the center in darkness or to sit under candle light. We would love to provide rechargeable emergency lights to these projects to assist with continued lighting.

CP	Water cooler	3	\$ 544	Projects like Cuttack, Markapur, Pappakoil, Kallar and Thindivanam have extreme weather conditions and during summer the temperature soars very high and lot of people suffer from sun stroke. Throughout the day many of our sponsored children prefer being at the child care center than their homes or the streets to escape the heat. Serving children cool water would be soothing and satisfying.
CP	Cooking Pots (big and small vessels at kitchen)	2	\$ 147	Currently, most of the cooking vessels at the Ambur and Thindivanam kitchens have worn out and need immediate replacement. These projects serve around 100 to 150 children and cooking vessels are a basic need.
CP	Multi purpose Portable Table (Table mate)	8	\$ 37	To assist the children while writing letters to their sponsors. These tables would enable the children sit in a correct posture and comfortable position, thus help them write and draw better. Right now the children sit on the floor while writing letters.
CP	Pedestal Fans	10	\$ 62	During summer the temperature in India rises upto 48 degree C in most part of the country. With the heated roof and congested rooms the place becomes very stuffy for the children and staff. Pedestal fans could be of great use to help cool down the temperature at the centers and provide a comfortable atmosphere for the children.
UIS	Music Dept	1	\$ 1,500	Guitar accessories, piano cover, bass guitar cover, 3 in 1 guitar stand, drum throne, drum base pedal, choir mics (6), sound mixer, speakers (2)
TC	Sewing Machines	10	\$ 250	To prepare for next Womens Empowerment location
TC	Floor mats	30	\$ 4	
TC	Water Filters	5	\$ 44	
CTC	Laptop Dell	1	\$ 735	
CTC	Cannon Printer, Scanner and Copy machine	1	\$ 294	
CTC	Scooter-Hero Honda	1	\$ 1,030	2 wheeler for CTC office use
CTC	Indian Music Instruments	6	\$ 147	for 6 new worship centres
CTC	Cooling fans	20	\$ 44	Table and ceiling fans for CTC house churches
